Pot Plants of Cannas

One of Our Specialties

We are again this season preparing a large stock of Cannas established in 3-inch pots for delivery April 1st and throughout the spring months. We have specialized in these for a number of years and the annually increasing demand convinces us that these plants are appreciated by the trade.

The florist who prepares for the demand for Easter plants will find this well-established stock, of which we can make delivery either before or immediately after Easter, a profitable investment. The plants will be in proper condition to shift at once into 4- or 5-inch pots, thus making ideal plants for sale at bedding-out time.

Prices for well established 3-inch pot plants of Cannas, ready April first, are \$1.00 per doz.; \$8.00 per 100; \$75.00 per 1000 for all varieties offered above as roots at \$8.00 per 100 or less. On varieties offered above at \$10.00 per 100 or over, the price of pot plants will be the same as that quoted for roots.

Primulinus Hybrid Gladioli

These are most attractive, easy to grow, and sure to bloom. They lend themselves particularly well to interesting decorative effects and soft color harmonies.

In hot, dry locations, where other varieties would burn out, they will still give a wealth of flowers, but naturally they respond, like all Gladioli, to high cultivation and favoring environment. The color range runs from primrose to rich orange, apricot, and crimson, but there will be shades of pink and rose as well, together with rare coppery hues. We offer a mixture of named varieties, grown separately, and blended to give a proper color balance. 30 cts. per doz.; \$1.75 per 100; \$15.00 per 1000.

Dreer's Gold Medal Gladioli

Our Gold Medal Blends are made up entirely of named sorts, grown separately, and blended according to a carefully considered formula, so that there may be a proper balance of the various colorings and shadings. We know from experience that it is practically impossible to grow Gladioli in mixture and have them give satisfaction to our customers. Such mixtures soon become loaded with less desirable but rapidly propagating sorts and the whole color scheme is thereby thrown out of balance.

In our blends we use only the finest named kinds and no variety enters into them that is not large flowering and of attractive color. Good texture, strong spike and artistic placement of the blooms are requirements of the greatest importance. All are sorts that are well worth growing individually.

Section One. The range of coloring extends from rich rose through old rose, rose ash, orange scarlet, and bright red, to deep crimson and velvety maroon. 35 cts. per doz.; \$2.25 per 100; \$18.00 per 1000.

Section Two. From palest blush to warm deep pink and soft rose, from cream and primrose to citron yellow and salmon-orange, together with snowy and tinted whites and other sorts splashed or stained with deeper blending shades. The colorings of our Gold Medal Section 2 Blend always carry a strong appeal. 35 cts. per doz.; \$2.25 per 100; \$18.00 per 1000.

Section Three. Pale lavender, deep blue, lilac, heliotrope, amaranth, and velvety royal purple,—all of the rich "Pansy" shades have been garnered for this blend. 50 cts. per doz.; \$3.00 per 100; \$28.00 per 1000.

All Sections Mixed. An actual mixing in due proportion of bulbs from the three numbered blends. If you want all of the possible worthwhile Gladiolus colorings, you should find them here. 35 cts. per doz.; \$2.25 per 100; \$18.00 per 1000.

DREER'S SELECT DAHLIAS

One of Our Leading Specialties

We wish to call your special attention to the seven new Dahlias offered on this page because we know that they are outstanding in every respect. The three exhibition novelties are bound to appeal to the flower lover to whom size is an essential factor.

In Nesthaekchen we have a Miniature Dahlia of outstanding merit. While we do not believe that the Giant Flowered Dahlias are doomed as favorites we also know that the Miniature Dahlias will be grown most extensively in years to come. They have a charm of their own. Besides their value in the garden, where they form compact plants covered with blooms, the gracefully formed flowers are admirable for bouquets and many types of decoration. From the large list of the new Miniature Dahlias we have picked Nesthaekchen as having a particularly charming appeal.

The prices quoted for the seven novelties given on this page are for green plants, ready May 10, and we do not supply roots or divisions of these.

All other varieties (offered on pages 41-43 incl.) will be supplied in dormant field-grown roots or in strong division of such roots of proper planting size (not clumps).

The lower lip of the flower has a tessellated marking of pale purple while the upper lip forms a hood over the dark stamens. 3-inch pots, \$2.50 per doz.; \$20.00 per 100.

Young Stock in 2-inch Pots, for Growing on

The following list embraces the best of the standard varieties, as well as the best of the more recent introductions.

The stock offered is of last summer's propagation. The plants from which the cuttings were made are planted in the open field, where many of them have stood for ten to twenty years. The young stock is therefore very superior to such propagated from the blind wood of forced plants. It is not only 6 to 9 months older, but much more vigorous.

French Hydrangea

Ami Pasquier. A new French introduction, fully as deep in color as Marechal Foch. A very vigorous grower blooming a week earlier than Marechal Foch. \$2.00 per doz.; \$15.00 per 100.

Baardse's Favorite. An excellent new pink variety that is entitled to a fair trial. Certainly more desirable than Gen. de Vibraye, and a strong rival for Gertrude Glahn. \$1.25 per doz.; \$10.00 per 100.

Clouet Hamel. Compact plant with deep pink blooms. Free flowering during mid-season. A very promising new French sort. \$2.50 per doz.; \$20.00 per 100.

Elmar. Large trusses of deeply serrated dark pink, almost red flowers. 90 cts. per doz.; \$7.00 per 100.

Flambard. Vigorous; dark pink; midseason. \$2.50 per doz.; \$20.00 per 100.

Gen. de Vibraye. Very dependable popular early pink. 90 cts. per doz.; \$7.00 per 100.

Gertrude Glahn. Large trusses of dark rose florets. This variety has steadily increased in popular favor until it stands today as the most popular pink variety for forcing. \$1.00 per doz.; \$8.00 per 100.

Giselher. A very unusual deep carmine novelty. Early and forces easily. \$1.25 per doz.; \$10.00 per 100.

Gloire de Vendome. Late, compact, vigorous, very free. Small red trusses. \$2.00 per doz.; \$15.00 per 100.

Helge. A very popular early compact variety with beautiful red flowers. \$1.00 per doz.; \$8.00 per 100.

Henri Lambert. Vigorous, very early, and a heavy grower with immense trusses of large light pink flowers. \$1.00 per doz.; \$8.00 per 100.

Lafayette. Rich red. Unusually free flowering and very early. Makes a wonderful pot plant and is easy to force. Blooms as early as Marechal Foch. We recommend it most highly. \$2.00 per doz.; \$15.00 per 100.

(Hybrid Tea Varieties)

**Mrs. J. D. Eisele—Hybrid Tea Rose*****The New Perfumed Rose*****Mrs. J. D. Eisele**

U. S. Plant Patent No. 67

The buds, the expanding flowers, as well as the fully developed blooms of this new Rose, are absolutely perfect in every stage of development. This is due to the unfurling uniform petals of the long pointed buds, which are arranged in spiral form, reflexing as they unfold, and giving the fully developed flower a most perfect camellia-like formation. The blooms measure 5 to 6 inches in diameter. Aside from its beautiful shape it is a Rose with exceptional keeping qualities, the cut blooms lasting fully a week in good condition. The color is a luscious shade of cherry rose overlaid with a scarlet glow. Its fragrance is most intense and pleasing, being that of the old Roses of 50 years ago. Strong two-year-old field grown plants, \$1.00 each; \$10.00 per doz.; \$80.00 per 100.

Through the proper applications of fertilizers, bone meal, **Bovung**, sheep manure, etc., beautiful lawns are to be obtained. Planet Jr. No. 210 Fertilizer Distributor

Additional fertilizing equipment is available and descriptive information will be sent upon request.

BOVUNG

An Organic Fertilizer

Bovung is simply cow manure that has had practically all of the moisture taken from it immediately after being removed from the barns.

Bovung will be the proper fertilizer to use wherever feeding is contemplated. We have experimented with it at our Riverton Nurseries upon pot grown plants and upon field grown stock as well, with such satisfactory results that we are offering **Bovung** as a better fertilizer than any similar product.

As a fertilizer for grasses, **Bovung** is ideal and while a little goes far no harm will occur through liberal applications.

Bovung is in excellent mechanical condition, being light and dry, and so well pulverized that it may be used in fertilizer spreaders just as easily as any chemical fertilizer. A 50 pound bag contains more than two bushels of manure.
